Summary

As a passionate and driven individual embarking on my journey in the field of software development, I am eager to leverage my skills and knowledge as a full-stack developer. Proficient in Python and equipped with a solid foundation in both front-end and back-end development, I have completed over 15 projects, honing my abilities in creating robust and scalable solutions. With a keen eye for detail and a commitment to continuous learning, I am enthusiastic about contributing to innovative projects and furthering my expertise in the ever-evolving world of technology.

Education

Voorhees College

M.Sc Physics (GPA: 7.00)

May 2020

Vellore, TamilNadu

Experience

Matrimony.com

Customer Service Associate

July 2022 - Present

Chennai, TamilNadu

- Utilized customer relationship management (CRM) software to document customer interactions and update customer profiles. consistently met or exceeded performance targets, including average time and productivity.

Projects

MERN Full-Stack Blog Web Application | React.js, HTML, CSS, JavaScript, Node.js, Express.js MongoDB, JWT

- Implemented user authentication and authorization using JWT (JSON Web Tokens) for secure access to blog features. Designed and developed the front-end using React.js, creating a modern and intuitive user interface with components for posting, editing, and deleting blog entries. .
- Developed RESTful APIs with Express.js and Node.js to handle HTTP requests, enabling seamless communication between the front-end and back-end. Implemented CRUD operations to allow users to create, read, update, and delete blog posts, providing a seamless content management experience.
- Integrated real-time updates using WebSockets or other technologies to enable instant notifications and live interactions between users. Ensured cross-browser compatibility and responsiveness for optimal user experience across various devices and screen sizes.

College-Management-System | Python, Django, Mysql

- Developed a comprehensive College Management System using Python Django framework and MySQL database, focusing on CRUD (Create, Read, Update, Delete) operations. Designed and implemented a user-friendly interface for administrators, faculty, and students to manage various aspects of college operations, including student enrollment course registration and attendance tracking.
- Implemented CRUD operations to enable users to create, read, update, and delete records such as student details, course information, and examination schedules, enhancing data management efficiency.

Disney-Plus Clone | React.js, Firebase, Styled Components, Redux

- Developed a fully functional Disney Plus Clone web application using React, Firebase, Styled Components, and Redux, closely mimicking the features and user experience of the original platform. Implemented a responsive and visually appealing user interface with Styled Components, ensuring consistency and compatibility across different devices and screen sizes.
- Integrated Firebase authentication and real-time database capabilities to enable user authentication, user data storage, and seamless data synchronization across multiple devices. Utilized Redux for state management, allowing for efficient and predictable handling of application state and ensuring a smooth and interactive user experience.

Technical Skills

Front-end: HTML, CSS, JavaScript, TypeScript, React.Js, Next.Js, Bootstrap, Tailwind CSS, Material-UI

Back-end : Python, Node.js, Express.js, Django, Flask,

Data-bases: My-Sql, SQLite, MongoDB

Version Contro: Git and GitHub
